

# Indiana HERS Ratings: Comparison to the State Energy Code

November 1, 2017

# Indiana HERS Data Set

## *Background*

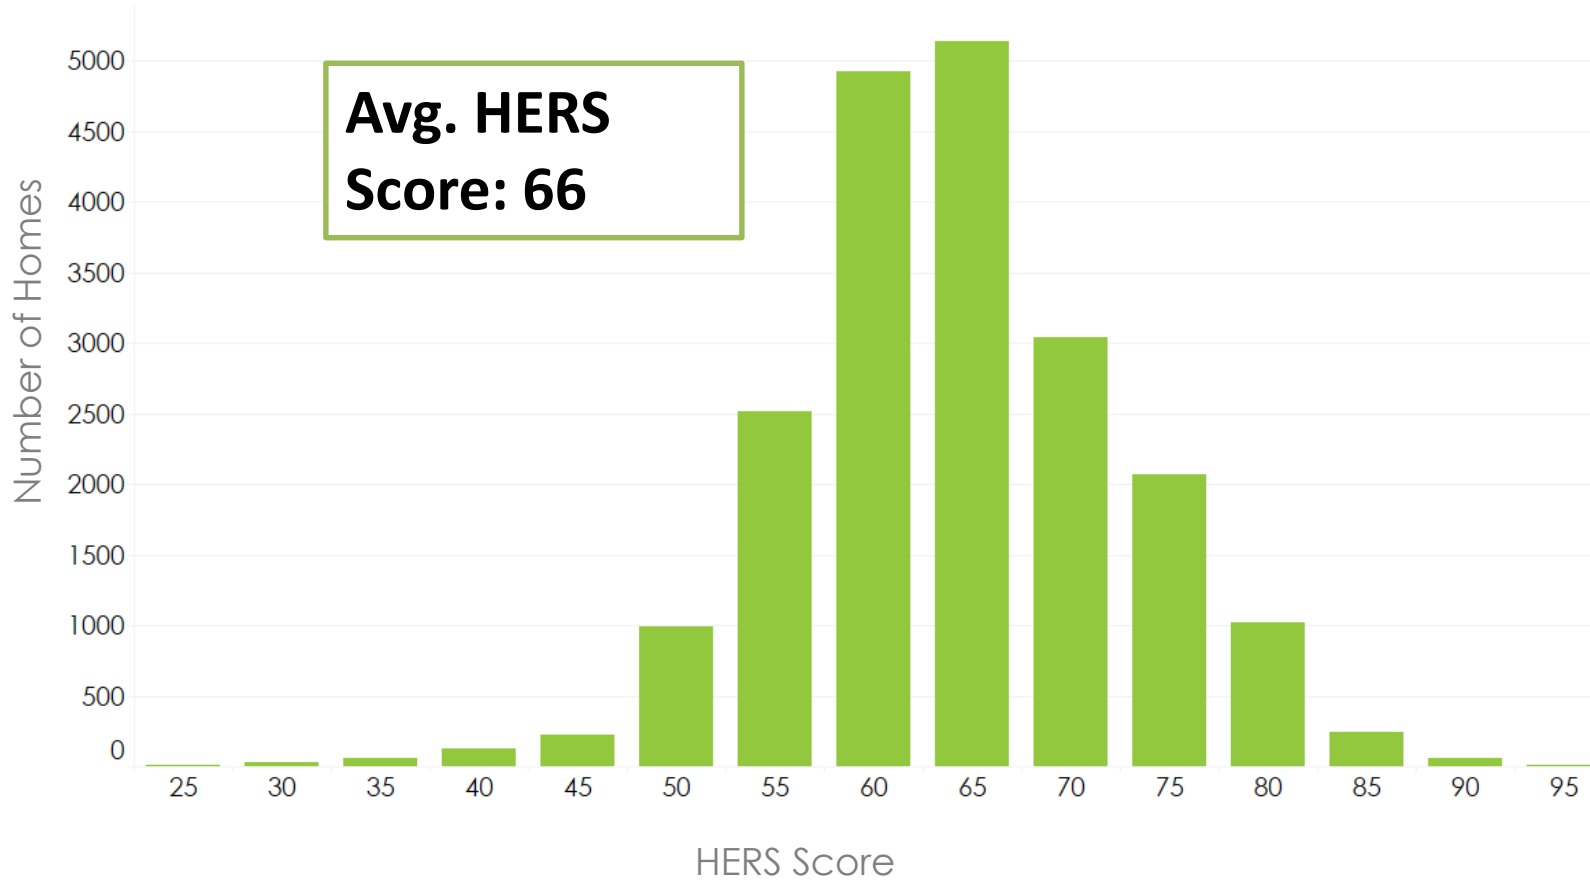

- MEEA received a dataset for all HERS rated homes in Indiana from RESNET (2014 – 2016)
- Dataset includes HERS score, plus all features that impact building efficiency (e.g. wall insulation level, envelope air sealing, etc.)
- MEEA conducted an analysis to determine:
  - Typical construction practices for HERS rated home
  - How rated homes compare to the energy code

## IN HERS Data set

- New Construction: Single Family (2014 – 2016)
- # of homes: 20,446
- Average size: 3200 Sq. Ft. (Conditioned)
- Average HERS Score: 66
- HERS Rated vs. new 1-family permits statewide
  - 2014: 54%
  - 2015: 56%
  - 2016: 48%

# HERS Score Breakdown

*All Homes*

REMRate v. 14.6 or less

# Energy Star Homes

*All Homes*

■ yes ■ no

# Conditioned Sq. Ft.

*All Homes*

# Comparing Data to Code Requirements

## 2009 IECC w/ Indiana Amendments (CZ 5)

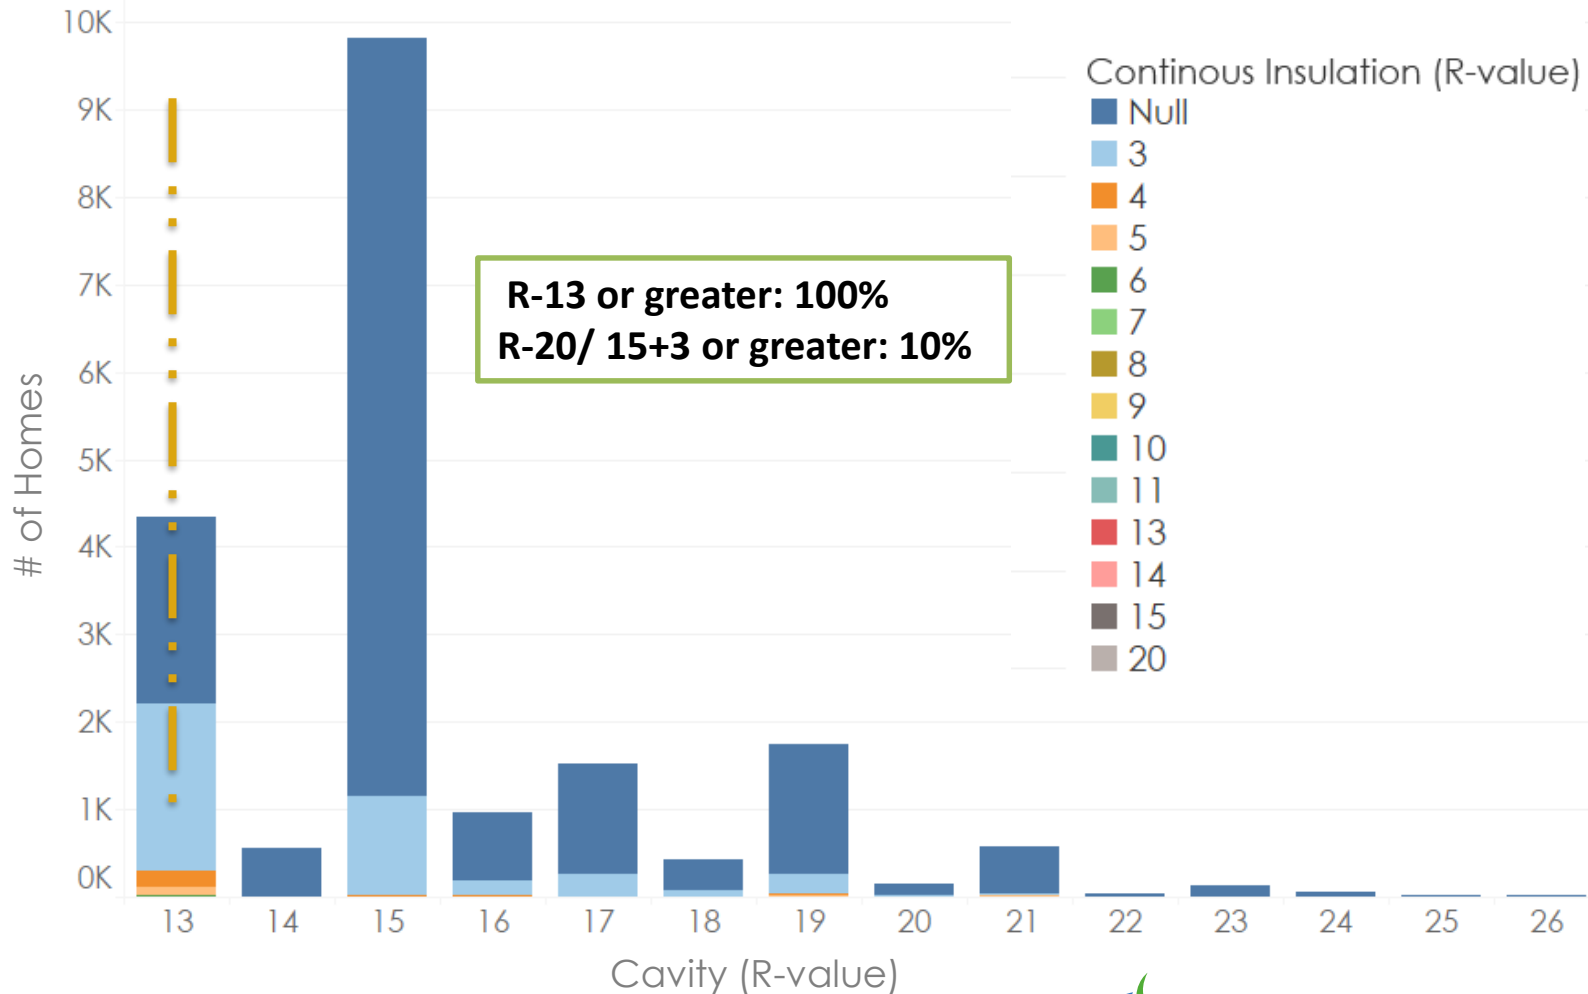

- **2009 IECC**

- Foundation Insulation: R-13
- Wall Insulation: R-13
- Ceiling Insulation: R-38
- Windows: U= 0.35
- Air Leakage: 7 ACH50 (Mandatory)
- Duct Leakage: 8 CFM 25/100 sq. ft. (Mandatory)
- High Efficacy Lighting: 50% (Mandatory)
- AC Efficiency – 13 SEER
- Furnace Efficiency – 80 AFUE

Indicates Minimum Code Req.

# Above Grade Wall Insulation (R-Value)

## Prescriptive Code Requirement

# Insulation Quality

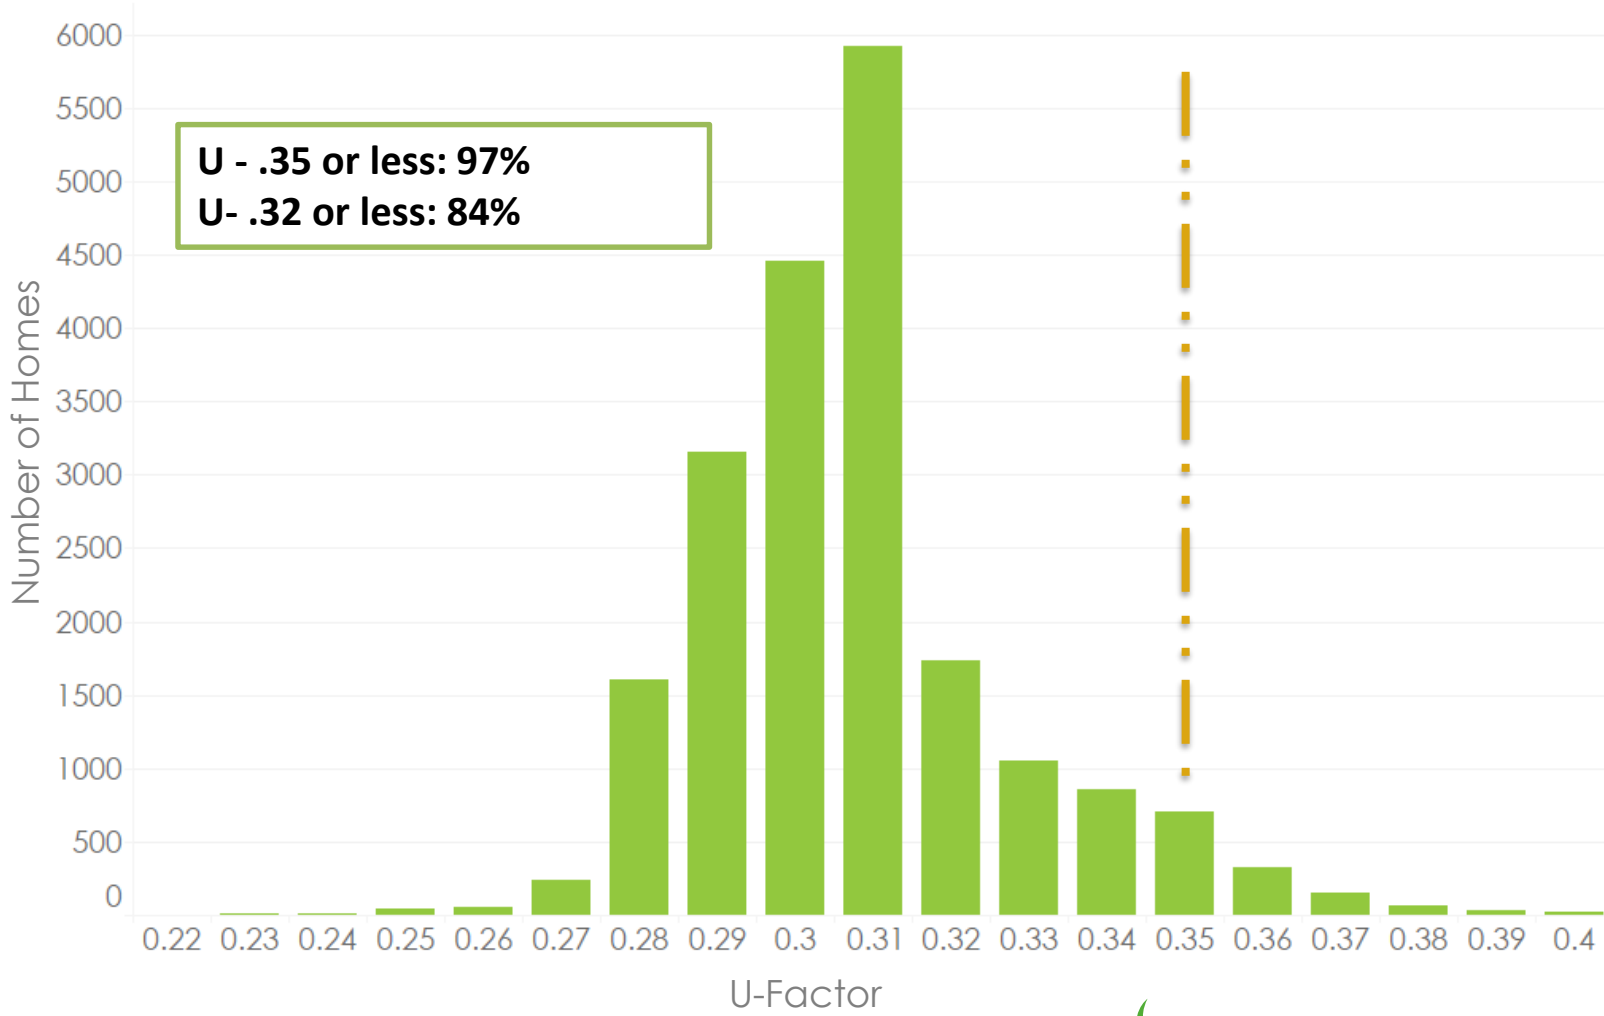

*Installations Rated with a Value of 1,2,3*

\* Grade 1 is a mandatory requirement

# Window Efficiency (U-Factor)

*Prescriptive Code Requirement*

# Air Leakage (ACH50)

*Mandatory Code Requirement*

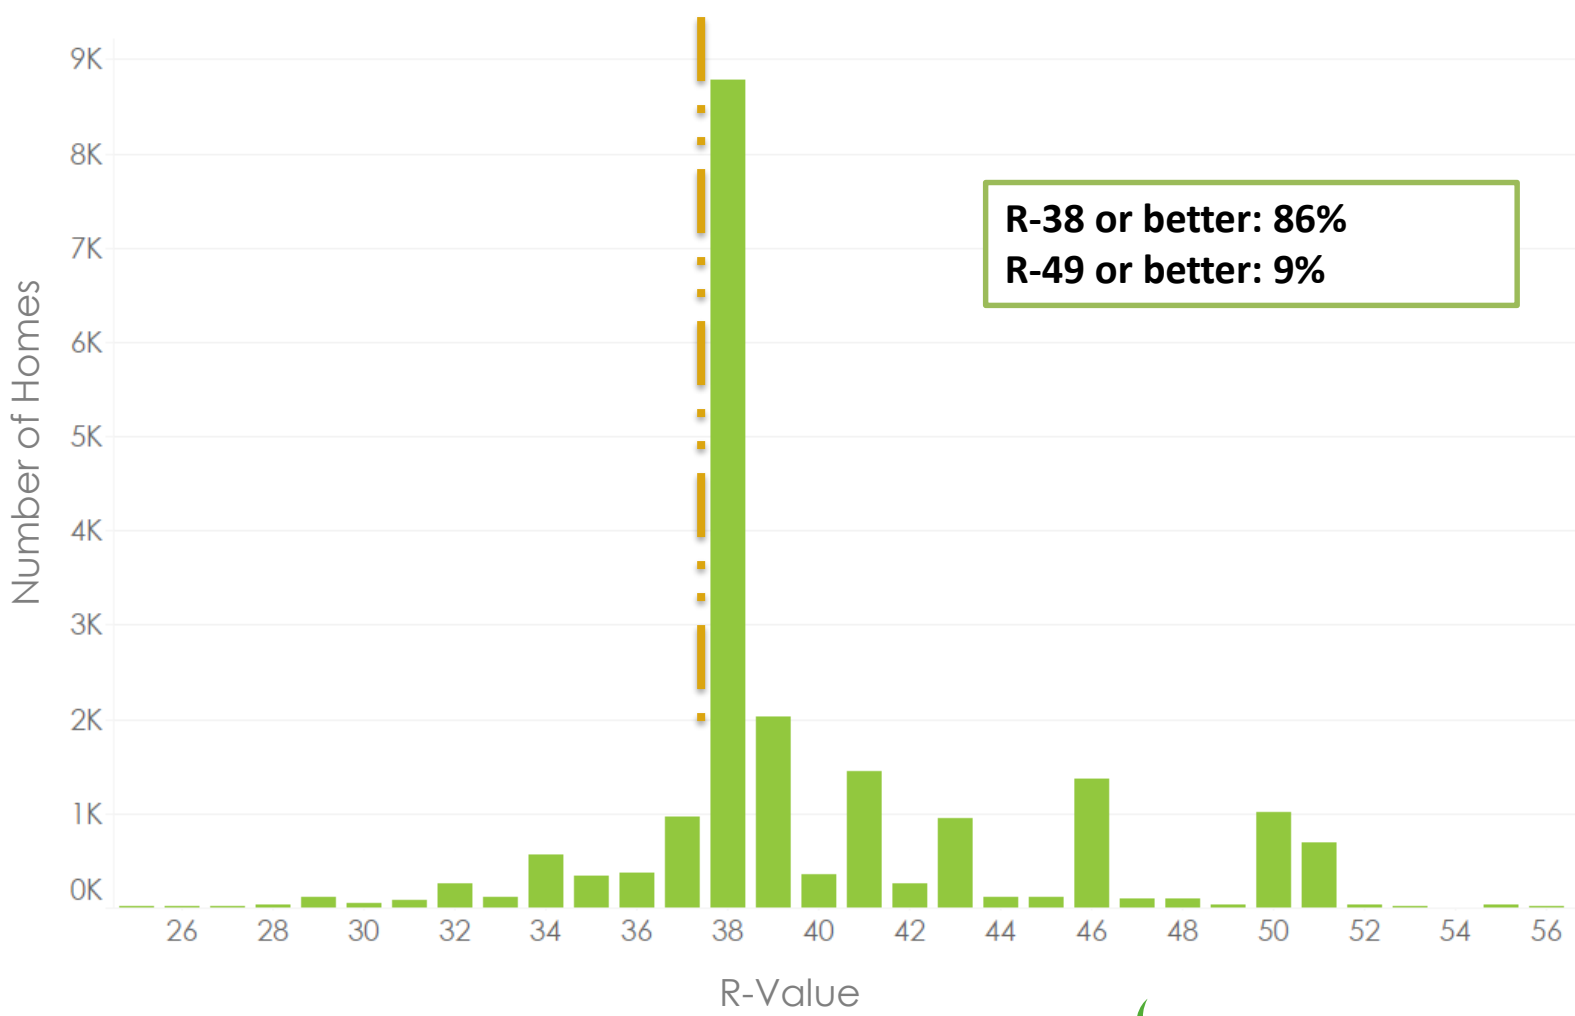

# Ventilation Type

None Exhaust Only Balanced Air Cycler

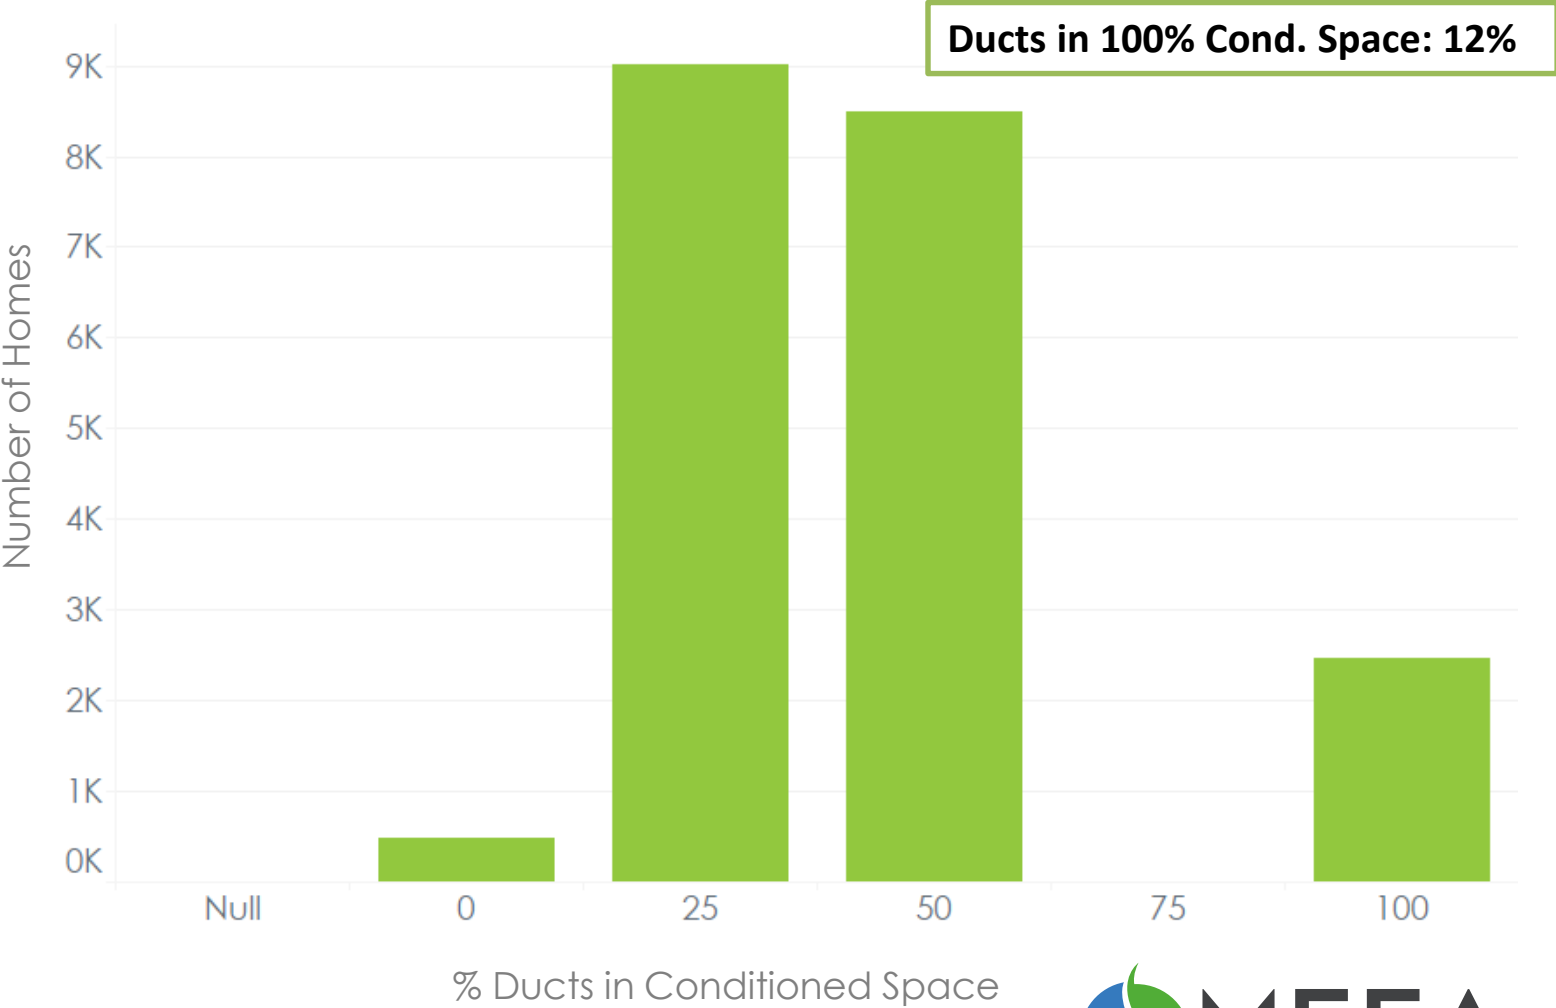

# Ceiling Insulation (R-Value)

*Prescriptive Code Requirement*

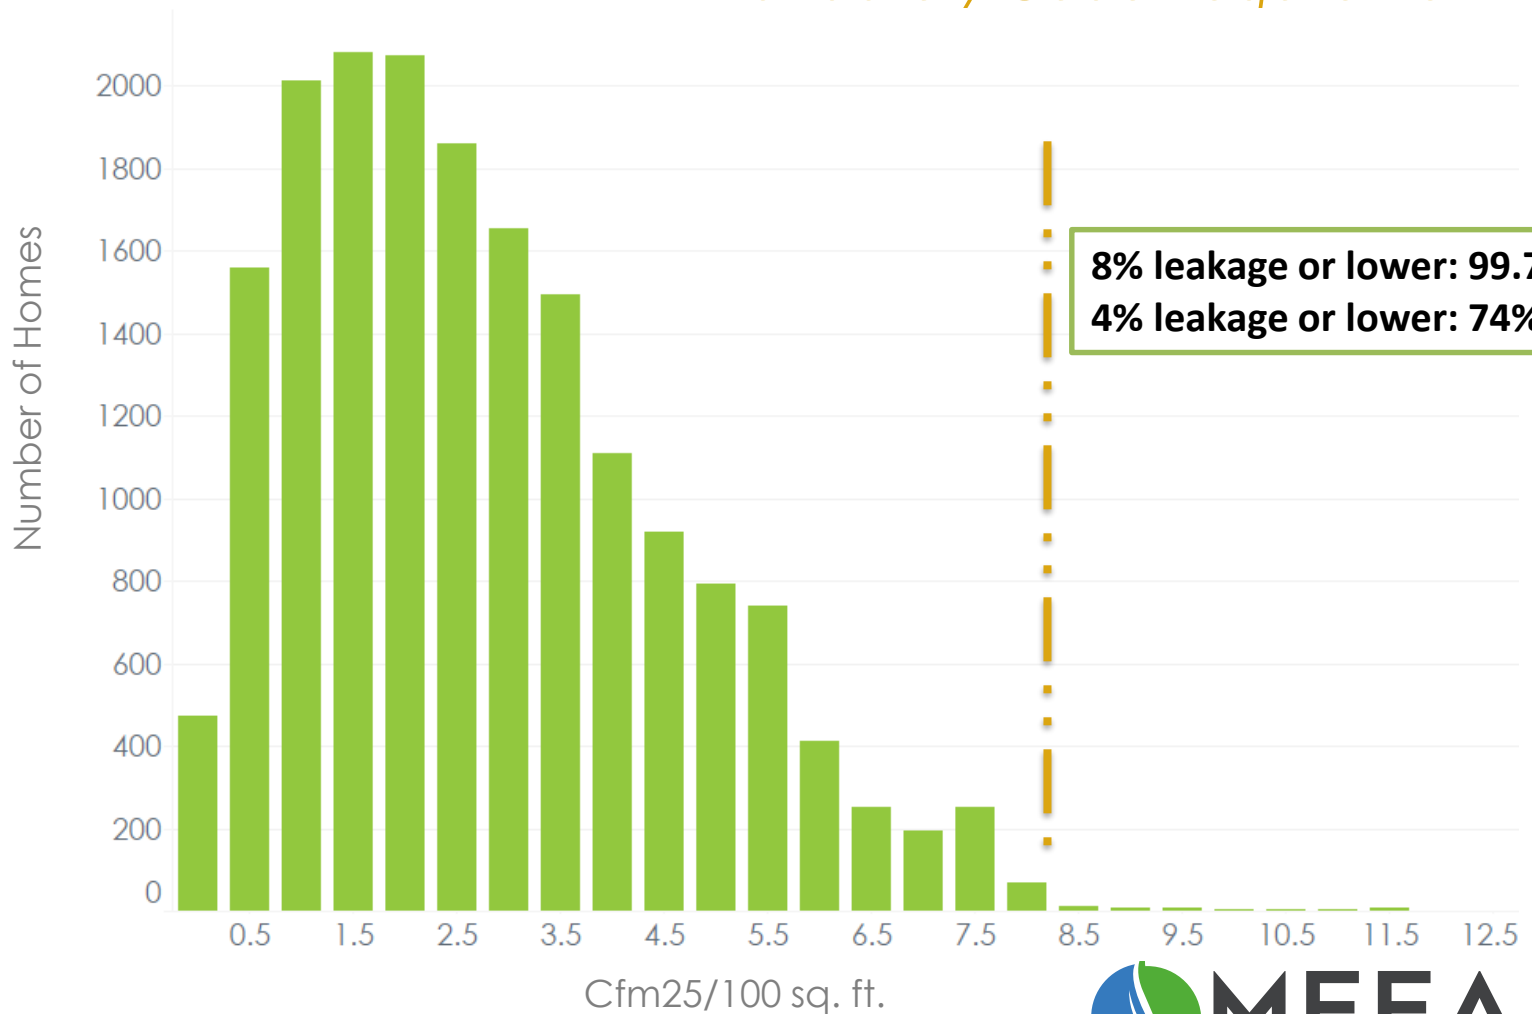

# Ducts in Conditioned Space

*Prescriptive Code Requirement*

# Duct Leakage to Outside – Unconditioned Space\*

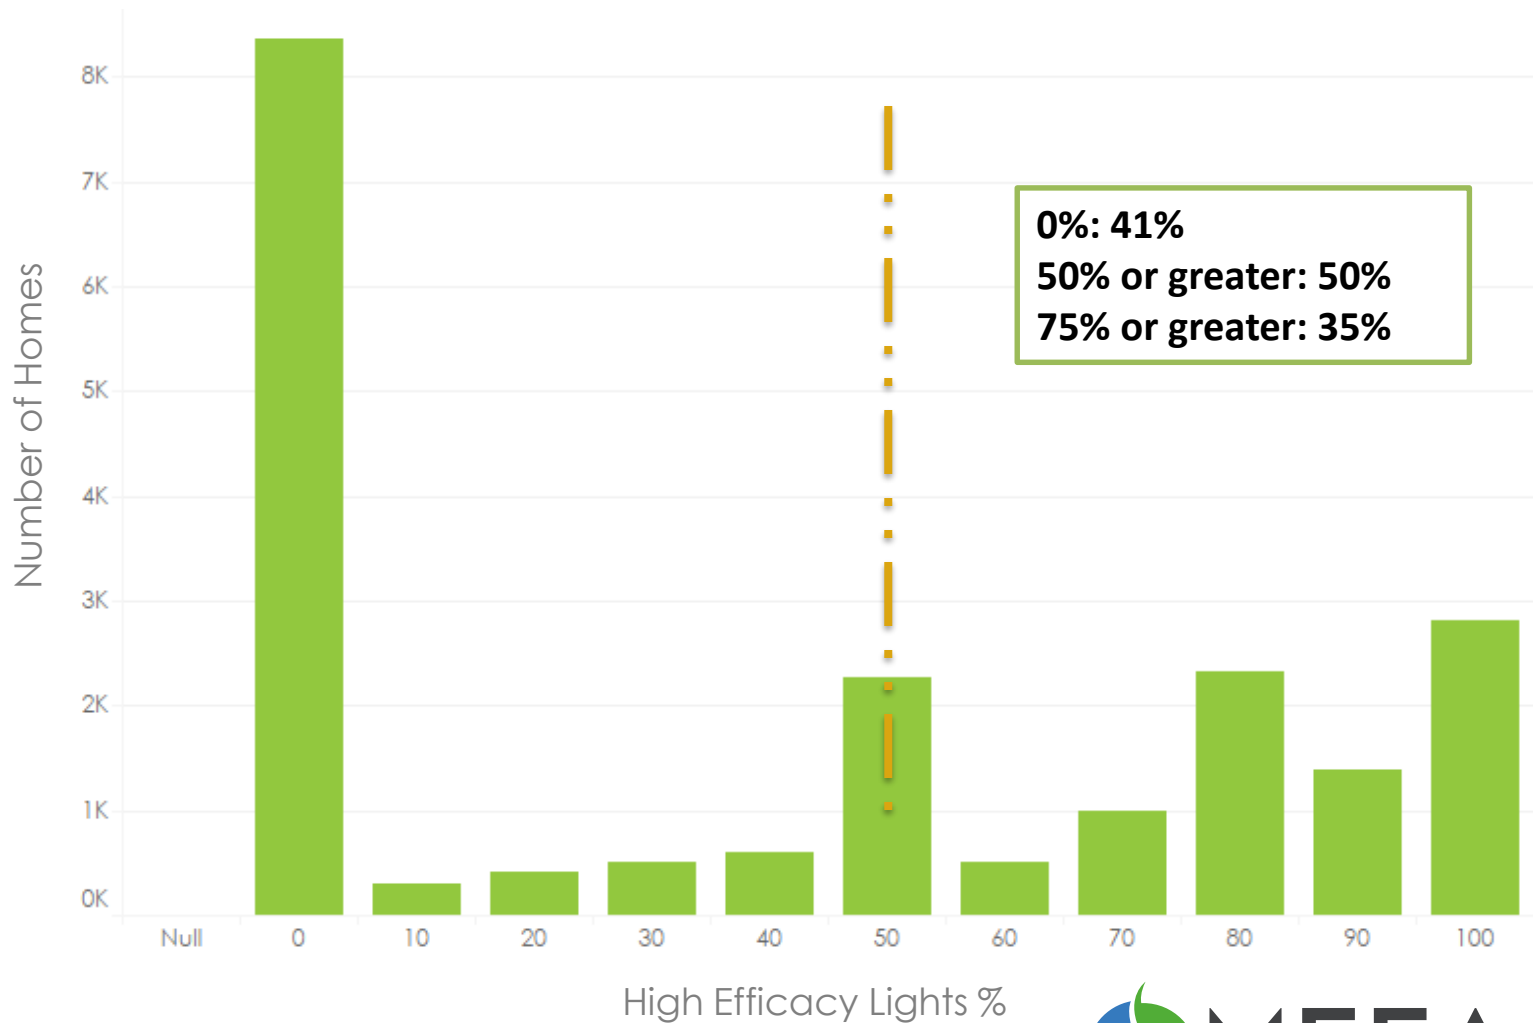

*Mandatory Code Requirement*

\* Only showing homes w/ ducts in unconditioned space

# High Efficacy Lighting (%)

## Mandatory Code Requirement

# AC Efficiency (SEER)

*Meet Federal Minimum*

Null = Heat Pump

# Furnace Efficiency (AFUE)

*Meet Federal Minimum*

Null = Heat Pump
