### Course Overview

The MCC Nebraska Commercial Energy Code Training Course will introduce students to the new Nebraska energy code, as well as advanced building technologies that are becoming more widely available and increasingly incorporated into projects. This eight-week, online certification course will provide an in-depth look at the new commercial energy code requirements, including critical background information on important related topics in building science, best practices, advanced technology and practical applications. This online certificate course is designed to give students an advantage in the construction industry job market, where energy codes are of increasing importance.

### Class Schedule

Date	Topic
January 10	Introduction and History of Energy Codes
January 17	Commercial Energy Codes Basics
January 24	Building Science
January 31	Mechanical Systems ( <i>Guest lecturer</i> )
February 7	IECC vs. ASHRAE
February 14	Electrical: Lighting and Power Systems ( <i>Guest lecturer</i> )
February 21	Comcheck Overview and Advanced Energy Technologies
February 28	Business Benefits, Economics, Marketing, Review and <b>Final Exam</b>
