Course Overview

The MCC Nebraska Energy Code Training Program is designed to introduce students to the new energy code, as well as advanced building technologies that are becoming more widely available and increasingly incorporated into projects. This eight-week, online certification course will provide an in depth look at the residential energy code, including important related topics in building science, best practices, advanced technology and practical application.

Class Schedule

Date	Topic
January 26	Introduction and History of Energy Codes
February 2	Building Science Part 1: Moisture Management
February 9	Building Science Part 2: Integrated Design and Practical Applications
February 16	Residential Energy Codes Basics
February 23	Mechanical Systems
March 2	Best Practices and Non-Code Standards
March 9	Advanced Energy Components & Technologies
March 16	Energy Code Benefits, Economics and Marketing
