---

## **Request for Proposal**

The suburban Chicago firm Sustained Ability Construction is seeking partners to assist in the prefabrication of insulated wood panels. The work would require the ability to create and deliver one to two dozen accurate, rough framed components with a maximum individual area of 125 sf each. The design is proprietary and some customization between panels should be expected. Please contact the below company representative for additional project details and to obtain the required Non Disclosure Agreement. Initially a single project is being contracted but future work will be dependent on project participation.

Sustained Ability Construction (SAC) is a startup building science consulting firm that will be bringing to market a screw on retrofit panel meant to quickly upgrade the existing housing infrastructure. More information can be shared with individual applying parties. Parties are asked to contact SAC before start of business, Monday, September 20<sup>th</sup>, 2021.

Appropriate parties will be given bid documents at that time and a bid return deadline of Friday, October 1<sup>st</sup>, 2021 will be set.
