Clean Power Plan
What We Know

- The CPP is currently stayed by the Supreme Court, and is being reviewed by the Court of Appeals for the D.C. Circuit.
- President-elect Trump has indicated he would like to “rescind” the Clean Power Plan.
- Transition team has not offered specifics on the new administration’s desired course of action.
Clean Power Plan
Potential Outcomes

Administration may:
• Decline to defend rule in court
• Decline to enforce CPP
• Request a voluntary remand from the D.C. Circuit
• Withdraw the rule

Congress may:
• Pass legislation invalidating the CPP
Clean Power Plan
Medium-Term Considerations

• CPP in current form unlikely to be implemented or enforced. Note that several states on track to meet CPP targets.
• Under Mass v. EPA, EPA must regulate GHGs, unless Congress passes legislation prohibiting it.
• Carbon regulation under Clean Air Act may return in different form.
• Air quality regulations under the Clean Air Act regularly take years to be implemented.
• Questions over other components of President Obama’s Climate Action Plan
